

Technical Data Sheet

# **Acrylic Foam Tape RT8000 Series**

Authorized Distributor, Converter, and Fabricator www.jbc-tech.com

## **General Information:**

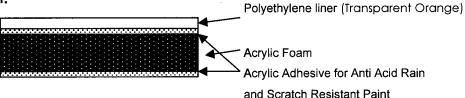

The acrylic Foam Tape RT8000 Series, which is made by a special process, has a superior adhesion performance and high flexibility. This tape is specially designed for exterior and interior parts attachments of automobiles.

The Acrylic Foam Tape can work well on the TOYOTA Anti Acid Paint and Scratch Resistant Paint.

#### Features:

- \* To the TOYOTA Anti Acid Rain Paint and Scratch Resistant Paint surface
  - a) Meets the TOYOTA specification of "The pressure sensitive adhesive double coated tape for exterior parts", and has a superior initial adhesion performance and durability.
  - b) Has the same workability as the standard type on the conventional paint.
  - c) Doesn't detach from the paint surface because of a superior stress relaxation properties.
  - d) Still has a superior adhesion performance on the conventional paint surface, and can be used for the same applications as the standard type acrylic foam tape.
- \*Follows the shrinkage and elongation of the plastic part caused by the temperature change, and has good stress relaxation properties which are very important for the automotive parts attachments.
- \*Provides a very high final adhesion and peeling strength.
- \*Excels in a variety of weather, solvent and high temperature resistance.

# Configuration:

### **Product line:**

	Tar	oe .	Liner		
Tape No. Thickness		Color	Color	Material	
RT8002	0.2mm				
RT8004	0.4mm				
RT8006	0.6mm				
RT8008	0.8mm	Gray			
RT8012	1.2mm	Glay	Transparent		
RT8016	1.6mm		Orange	Polyethylene	
RT8020	2.0mm		Change		
RT8025	2.5mm				
RT8030	3.0mm				
RT8035	3.5mm	White			
RT8040	4.0mm				

Usage: Several kinds of parts attachment,

i.e. Body side molding, Emblem, Cladding panel, and Spoiler etc.

Test results:

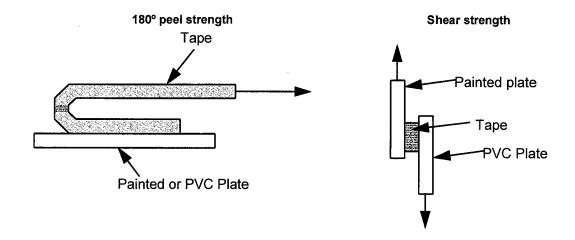

It	ems	Substrates	RT8008	#5521
Thickness (mm)			0.8	
	Initial	AARPP	12.7	12.5
		PVC	17.7	18.2
	Normal state	AARPP	13.8	14.0
180° Peeling		PVC	17.8	18.2
Strength	High temperature	AARPP	5.8	5.3
(N/cm)		PVC	8.9	8.6
	Warm water	AARPP	17.0	15.8
	Deterioration	PVC	15.8	16.7
	Thermal	AARPP	21.3	20.9
	Deterioration	PVC	16.7	17.0
Share strength (Mpa)	Initial	AARPP / PVC	0.65	0.68
	Normal state	AARPP / PVC	0.68	0.69
	High temperature	AARPP / PVC	0.23	0.20
	Warm water Deterioration	AARPP / PVC	0.45	0.51
	Thermal Deterioration	AARPP / PVC	0.75	0.82
	Immersion in gasoline	AARPP / PVC	0.47	0.45
Stress mod	del test (mm)	AARPP / DP	2.0	1.5

<sup>\*</sup> AARPP: Anti Acid Rain Painted Panel.

<sup>\*</sup> PVC: Polyvinyl Chloride Panel

<sup>\*</sup> DP: Duralumin Panel

- (1) Thickness: Measured by the dial thickness gauge
- (2) Adhesion performance: Follow the Toyota engineering standards "pressure sensitive adhesive double coated tape for exterior parts".

(3) Stress model test

Substrate: Duralumin panel and Painted panel

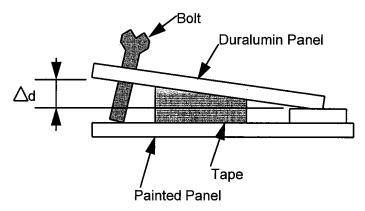

Tape size: 10mm x 50mm

Pressurizing: 5 kg roller one way

Temperature: 23° C

After the exposure the sample at 23° C x 24 hours, turn the bolt and add the distance  $\Delta d$ .

After the warm water immersion of the sample in the water tank (40° C x 100 hours), check the tape detachment.
